STEP 1: Make All link Trunk

<https://www.youtube.com/@techwithravish>

Switch 1 Configuration:

Switch0>enable

Switch0#conf t

Switch0(config)#interface range fa0/1-2

Switch0(config-if-range)#Switchport mode trunk

Switch 3 Configuration:

Switch3>enable

Switch3#conf t

Switch3(config)#interface range fa0/1-2

Switch3(config-if-range)#Switchport mode trunk

STEP 2:VTP Configuration on Switches:

Switch 0 Configuration:

Switch>enable

Switch#configure terminal

Switch(config)#vtp domain ccna

Switch(config)#vtp mode Server

Switch(config)#vtp version 2

Switch(config)#vtp password SecurePass123

Switch(config)#end

VTP Configuration and Rules:

Switch 0 Configuration:

Switch>enable

Switch#configure terminal

Switch(config)#vtp domain ccna

Switch(config)#vtp mode Server

Switch(config)#vtp version 2

Switch(config)#vtp password SecurePass123

Switch(config)#end

Switch 1 Configuration:

Switch>enable

Switch#configure terminal

Switch(config)#vtp domain ccna

Switch(config)#vtp mode transparent

Switch(config)#vtp version 2

Switch(config)#vtp password SecurePass123

Switch(config)#end

Switch#show vtp status

Switch 2 Configuration:

Switch>enable

Switch#configure terminal

Switch(config)#vtp domain ccna

Switch(config)#vtp mode client

Switch(config)#vtp version 2

Switch(config)#vtp password SecurePass123

Switch(config)#end

Switch#show vtp status

Switch 2 Configuration:

Switch>enable

Switch#configure terminal

Switch(config)#vtp domain ccna

Switch(config)#vtp mode transparent

Switch(config)#vtp version 2

Switch(config)#vtp password SecurePass123

Switch(config)#end

Switch#show vtp status

Switch 2 Configuration:

Switch>enable

Switch#configure terminal

Switch(config)#vtp domain ccna

Switch(config)#vtp mode client

Switch(config)#vtp version 2

Switch(config)#vtp password SecurePass123

Switch(config)#end

Switch#show vtp status

Explanation:

If I will create any VLAN on Server Switch, it will be automatically created on the Clients but transparent mode switch will pass information to others without automatically update in database.

Even same for delete and rename vlan on the transparent mode switch.

The switches in transparent mode are independent of VTP update.
