

CEH v13 Practice Questions – Module 7: Malware Threats

1. What is the primary goal of malware?

- A. To encrypt legitimate traffic
- B. To test firewall rules
- C. To disrupt, damage, or gain unauthorized access to systems
- D. To perform routine system updates

Answer: C

2. Which type of malware disguises itself as a legitimate program?

- A. Worm
- B. Rootkit
- C. Trojan horse
- D. Ransomware

Answer: C

3. What is the primary method a worm uses to spread?

- A. Bundled with software installers
- B. Through email attachments only
- C. Self-replicates across networks
- D. Embedded in PDFs

Answer: C

4. Which malware type locks access to systems or files and demands payment?

- A. Spyware
- B. Adware
- C. Keylogger
- D. Ransomware

Answer: D

5. Which type of malware hides its presence on the infected system?

- A. Virus
- B. Adware
- C. Rootkit
- D. Botnet

Answer: C

6. What is a keylogger designed to do?

- A. Track browser cookies
- B. Record user keystrokes
- C. Execute shellcode
- D. Encrypt all files on a system

Answer: B

7. Which of the following best defines a logic bomb?

- A. A software that disables antivirus programs
- B. A program that executes only when certain conditions are met
- C. A worm that spreads via removable media
- D. A virus disguised as an image file

Answer: B

8. Which tool is commonly used to analyze malware in a safe environment?

- A. Nessus
- B. Any.Run
- C. Wireshark
- D. Shodan

Answer: B

9. Which technique helps detect malware by observing behavior instead of code?

- A. Signature-based detection
- B. Behavioral analysis
- C. Heuristic flagging
- D. Static binary scan

Answer: B

10. Which malware spreads by attaching itself to executable files?

- A. Trojan
- B. Rootkit
- C. Worm
- D. Virus

Answer: D

11. Which port is often targeted by malware exploiting SMB vulnerabilities?

- A. 80
- B. 443
- C. 139
- D. 8080

Answer: C

12. Which of the following can form a botnet when infected?

- A. Printer driver
- B. IoT device
- C. BIOS firmware
- D. Router firmware updates

Answer: B

13. Which malware relies on encryption to evade detection and hinder analysis?

- A. Worm
- B. Polymorphic malware
- C. Trojan
- D. Adware

Answer: B

14. What is the main difference between a virus and a worm?

- A. Viruses spread via USB, worms only online
- B. Worms require a host file, viruses do not
- C. Worms are self-replicating; viruses need a host program
- D. There is no functional difference

Answer: C

15. Which of these is a delivery method for malware?

- A. Fileless storage
- B. Malicious email attachments
- C. TPM firmware upgrade
- D. DNS tunneling

Answer: B

16. Which component is most often used in ransomware to encrypt files?

- A. MD5 hashing
- B. XOR obfuscation
- C. AES or RSA encryption
- D. Base64 encoding

Answer: C

17. Which type of malware pretends to be antivirus software?

- A. Ransomware
- B. Scareware
- C. Logic bomb
- D. Spyware

Answer: B

18. Which of the following tools is useful for unpacking malware binaries?

- A. Burp Suite
- B. UPX
- C. OpenVAS
- D. DirBuster

Answer: B

19. Which malware component enables remote control over infected systems?

- A. Keylogger
- B. Command-and-control (C2) server

- C. DNS resolver
- D. Syslog service

Answer: B

20. Which of the following file types is most often used to distribute macro malware?

- A. .exe
- B. .docm
- C. .iso
- D. .zip

Answer: B

21. What is a dropper in malware terminology?

- A. A tool that deletes user files
- B. A type of firewall bypass
- C. A program designed to install other malicious payloads
- D. A service that removes malware

Answer: C

22. Which of the following is NOT a common malware behavior?

- A. Disabling antivirus software
- B. Opening unused TCP ports
- C. Encrypting registry files
- D. Establishing persistent access

Answer: C

23. Which malware category includes software that secretly collects user information?

- A. Spyware
- B. Worm
- C. Ransomware
- D. Scareware

Answer: A

24. Which tool helps analyze dynamic malware behavior in a virtualized environment?

- A. Ghidra
- B. Cuckoo Sandbox
- C. tcpdump
- D. dnsenum

Answer: B
