

CEH v13 Practice Questions – Module 17: Hacking Mobile Platforms

1. Which of the following is a common mobile malware distribution method?

- A. USB drives
- B. Drive-by downloads
- C. CD-ROMs
- D. BIOS updates

Answer: B

2. What is rooting in Android devices?

- A. Factory reset
- B. Updating the OS
- C. Gaining administrative privileges
- D. Locking the bootloader

Answer: C

3. Which permission allows a mobile app to read SMS messages?

- A. READ_PHONE_STATE
- B. RECEIVE_BOOT_COMPLETED
- C. READ_SMS
- D. ACCESS_FINE_LOCATION

Answer: C

4. What is jailbreaking on iOS?

- A. Locking down an iOS device
- B. Gaining root access to remove Apple's restrictions
- C. Resetting the Apple ID
- D. Unlocking carrier restrictions

Answer: B

5. Which tool can analyze mobile app security for Android?

- A. MobSF
- B. Aircrack-ng
- C. Hydra
- D. Nmap

Answer: A

6. What is a key concern when using public mobile charging stations?

- A. Battery overheating
- B. Juice jacking
- C. Data throttling
- D. Network spoofing

Answer: B

7. Which protocol is typically used to sync mobile email apps?

- A. FTP
- B. IMAP
- C. Telnet
- D. NTP

Answer: B

8. Which of the following is a mobile device management (MDM) function?

- A. Encrypting website traffic
- B. Remote wipe
- C. DNS resolution
- D. Decrypting TLS packets

Answer: B

9. Which app store policy helps reduce mobile malware?

- A. No free apps
- B. Mandatory code signing
- C. Unlimited data access
- D. Public APIs

Answer: B

10. What is a common attack on mobile devices using rogue cell towers?

- A. Packet sniffing
- B. SSID spoofing
- C. IMSI catching
- D. ARP poisoning

Answer: C

11. What can an attacker do after gaining root access to a mobile device?

- A. Change the IMEI
- B. Increase battery life
- C. Access encrypted DNS
- D. Block physical SIM card

Answer: A

12. Which component verifies app authenticity in Android?

- A. PackageManager
- B. ART
- C. APK Validator
- D. Signature verification

Answer: D

13. Which of these is a secure mobile app development practice?

- A. Storing credentials in plaintext
- B. Using hardcoded encryption keys
- C. Validating inputs and outputs
- D. Logging sensitive data

Answer: C

14. Which Android file contains app permissions?

- A. build.gradle
- B. AndroidManifest.xml
- C. strings.xml
- D. MainActivity.java

Answer: B

15. What is the goal of mobile application reverse engineering?

- A. Improving UX design
- B. Discovering sensitive logic or credentials
- C. Testing battery drain
- D. Generating SSL certificates

Answer: B

16. What is a common risk when sideloading apps on Android?

- A. Performance drop
- B. Security updates
- C. Installing malicious apps
- D. Poor Wi-Fi reception

Answer: C

17. Which of these mobile OSs is more open to source-level modifications?

- A. iOS
- B. Android
- C. Windows Phone
- D. BlackBerry OS

Answer: B

18. Which tool helps analyze iOS app binaries?

- A. Radare2
- B. Ghidra
- C. Hopper
- D. IDA Pro

Answer: C

19. What does an MDM solution typically enforce?

- A. DNS filtering
- B. App whitelisting and password policies

- C. Email archiving
- D. CPU usage limits

Answer: B

20. What does two-factor authentication add to mobile login security?

- A. Encryption
- B. Faster logins
- C. A second layer of identity verification
- D. Device mirroring

Answer: C

21. What is a benefit of mobile app sandboxing?

- A. Decreased startup time
- B. Prevents apps from accessing each other's data
- C. Faster network speeds
- D. Open memory allocation

Answer: B

22. Which of the following is considered a threat to mobile app security?

- A. HTTPS
- B. Insecure data storage
- C. Bluetooth pairing
- D. Camera usage

Answer: B

23. Which mobile platform feature restricts installation of unknown apps?

- A. Google Assistant
- B. Secure Boot
- C. Play Protect
- D. App Ops

Answer: C

24. What type of malware sends premium SMS messages without user consent?

- A. Adware
- B. Spyware
- C. Ransomware
- D. SMS trojan

Answer: D

25. Which of the following techniques is used to analyze app behavior in a controlled environment?

- A. Static analysis
- B. Packet crafting
- C. Dynamic analysis
- D. Port scanning

Answer: C
