

CEH v13 Practice Questions – Module 2: Footprinting and Reconnaissance

1. What is the primary objective of footprinting?

- A. Exploiting a known vulnerability
- B. Gathering information about a target system
- C. Deleting logs after a successful attack
- D. Installing spyware remotely

Answer: B

2. Which of the following is considered a passive footprinting technique?

- A. Port scanning
- B. WHOIS lookup
- C. Banner grabbing
- D. SNMP walking

Answer: B

3. Which tool is commonly used to perform WHOIS queries?

- A. Nmap
- B. Metasploit
- C. Nslookup
- D. Domain Dossier

Answer: D

4. What kind of data does a DNS zone transfer typically reveal?

- A. MAC addresses of internal hosts
- B. Full listing of subdomains and records
- C. System uptime and patch levels
- D. Password hashes

Answer: B

5. Which search technique is used in Google hacking?

- A. Boolean search
- B. Recursive search
- C. Directory traversal
- D. Google dorking

Answer: D

6. Which of the following can be used to discover email addresses during footprinting?

- A. Shodan
- B. theHarvester
- C. Netcat
- D. Wireshark

Answer: B

7. Which record type in DNS maps a domain to an IP address?

- A. MX
- B. NS
- C. A
- D. PTR

Answer: C

8. What command can be used to perform a DNS lookup in Windows?

- A. dig
- B. dnslookup
- C. nslookup
- D. host

Answer: C

9. Which reconnaissance method involves using tools like Shodan or Censys?

- A. Social engineering
- B. Active footprinting
- C. Passive footprinting
- D. Malware injection

Answer: C

10. Which of the following tools is used to collect publicly available information?

- A. Wireshark
- B. OSINT Framework
- C. Hydra
- D. Tcpdump

Answer: B

11. Which website can provide archived versions of a company's web pages?

- A. Archive.org
- B. Google Scholar
- C. Shodan.io
- D. OpenDNS

Answer: A

12. What can be revealed through email footprinting?

- A. Internal routing tables
- B. OS patch levels
- C. Employee structure and names
- D. File permissions

Answer: C

13. Which of the following tools is used to gather subdomain information?

- A. Netcat
- B. Gobuster
- C. Sublist3r
- D. John the Ripper

Answer: C

14. Which command-line tool is used for DNS reconnaissance in Linux?

- A. traceroute
- B. dig
- C. arp
- D. ssh

Answer: B

15. What is the main risk of DNS zone transfer in footprinting?

- A. Disclosure of public keys
- B. Disclosure of internal hostnames
- C. Disclosure of encryption algorithms
- D. Disclosure of SSL certificates

Answer: B

16. Which social engineering technique is most relevant to footprinting?

- A. Phishing
- B. Pretexting
- C. Baiting
- D. Vishing

Answer: B

17. Which of the following sites would be most useful for footprinting an employee's job role?

- A. Facebook
- B. YouTube
- C. LinkedIn
- D. Instagram

Answer: C

18. What type of attack can be enabled by successful email enumeration?

- A. SQL injection
- B. Brute-force login
- C. DDoS
- D. Man-in-the-middle

Answer: B

19. Which tool allows automated gathering of metadata from files?

- A. Netdiscover

- B. ExifTool
- C. Dirb
- D. FTP

Answer: B

20. Which information is typically gathered during passive footprinting?

- A. OS version via packet injection
- B. Employee names via public records
- C. Service banners via direct scanning
- D. Port numbers via TCP connect scans

Answer: B

21. What is an advantage of passive footprinting?

- A. Generates firewall alerts
- B. Cannot be detected by the target
- C. Allows remote code execution
- D. Provides internal user credentials

Answer: B

22. Which of the following Google Dork can locate login pages?

- A. intitle:index.of
- B. filetype:log
- C. inurl:login
- D. ext:cfg

Answer: C

23. Which organization provides the most widely used DNS database for WHOIS queries?

- A. ICANN
- B. FBI
- C. Google
- D. IEEE

Answer: A

24. Which of these actions is considered active footprinting?

- A. Searching public job postings
- B. Sending DNS zone transfer requests
- C. Reviewing archived websites
- D. Searching social media

Answer: B

25. Which of the following can help identify technologies used on a website?

- A. WhatWeb
- B. ping
- C. Dirb
- D. Netcat

Answer: A
