

CEH v13 Practice Questions – Module 16: Hacking Wireless Networks

1. Which wireless encryption standard is considered the most secure today?

- A. WEP
- B. WPA
- C. WPA2
- D. WPA3

Answer: D

2. What tool is commonly used for wireless network auditing?

- A. Cain & Abel
- B. Aircrack-ng
- C. Nmap
- D. Nikto

Answer: B

3. Which frequency band is used by most 802.11n devices?

- A. 900 MHz
- B. 2.4 GHz
- C. 3.6 GHz
- D. 6 GHz

Answer: B

4. What is the role of a wireless access point (AP)?

- A. Translates public IP to private IP
- B. Routes packets over the Internet
- C. Acts as a bridge between wired and wireless networks
- D. Encrypts all outgoing data

Answer: C

5. Which attack involves intercepting packets from a wireless network?

- A. Replay attack
- B. Packet sniffing
- C. Brute force
- D. MAC flooding

Answer: B

6. Which mode in Wi-Fi is typically used to connect clients directly without an AP?

- A. Infrastructure mode
- B. Monitor mode
- C. Ad-hoc mode
- D. Bridge mode

Answer: C

7. What is the main weakness of WEP encryption?

- A. It uses dynamic keys
- B. It's too expensive to deploy
- C. It uses a static key vulnerable to cracking
- D. It doesn't allow roaming

Answer: C

8. Which tool is part of the Aircrack-ng suite for capturing packets?

- A. airodump-ng
- B. nmap
- C. Wireshark
- D. metasploit

Answer: A

9. What is a deauthentication attack used for?

- A. To connect to an AP
- B. To cause a denial of service on a Wi-Fi network
- C. To hide SSIDs
- D. To spoof DNS responses

Answer: B

10. What is the purpose of the handshake in WPA/WPA2?

- A. To allocate bandwidth
- B. To authenticate clients
- C. To encrypt SSIDs
- D. To route packets

Answer: B

11. Which antenna type focuses signals in a single direction?

- A. Omnidirectional
- B. Dipole
- C. Yagi
- D. Parabolic

Answer: C

12. What is the default port for RADIUS authentication commonly used in enterprise Wi-Fi?

- A. 80
- B. 443
- C. 1812
- D. 21

Answer: C

13. Which of the following is a method to secure a wireless network?

- A. Enable MAC filtering
- B. Use WEP encryption
- C. Hide SSID
- D. Enable DHCP

Answer: A

14. What kind of attack involves cloning an AP to trick users into connecting?

- A. Evil twin
- B. Wardriving
- C. MAC spoofing
- D. Rogue DHCP

Answer: A

15. Which protocol is commonly used for wireless encryption in WPA2?

- A. RC4
- B. AES
- C. DES
- D. Blowfish

Answer: B

16. What does SSID stand for?

- A. Secure Set Identifier
- B. Subnet Signal Identifier
- C. Service Set Identifier
- D. Station Security Identifier

Answer: C

17. Which of the following is a legal use of Wi-Fi hacking tools?

- A. Penetration testing with client permission
- B. Connecting to open networks without consent
- C. Cracking neighbor's Wi-Fi
- D. Performing man-in-the-middle attacks on public Wi-Fi

Answer: A

18. Which 802.11 standard provides speeds up to 600 Mbps?

- A. 802.11b
- B. 802.11g
- C. 802.11n
- D. 802.11a

Answer: C

19. What is war driving?

- A. Driving hardware at high CPU
- B. Searching for wireless networks while moving

- C. Crashing wireless routers
- D. Injecting fake SSIDs

Answer: B

20. What can be used to prevent rogue devices from accessing Wi-Fi?

- A. MAC address filtering
- B. Enabling DHCP
- C. Disabling HTTPS
- D. Port scanning

Answer: A

21. Which channel is non-overlapping in the 2.4 GHz band?

- A. Channel 4
- B. Channel 6
- C. Channel 10
- D. Channel 13

Answer: B

22. What does WPA3 offer over WPA2?

- A. Weaker encryption
- B. Backward compatibility with WEP
- C. Better protection against brute-force attacks
- D. No authentication at all

Answer: C

23. What is a hidden SSID?

- A. A network with MAC filtering
- B. A Wi-Fi network without password
- C. A network that does not broadcast its name
- D. A public hotspot

Answer: C

24. Which term describes capturing traffic for analysis on a Wi-Fi network?

- A. Tunneling
- B. Sniffing
- C. Spoofing
- D. Flooding

Answer: B

25. Which tool is used for Wi-Fi packet injection?

- A. hping3
- B. ettercap
- C. aireplay-ng
- D. sqlmap

Answer: C
