

CEH v13 Practice Questions – Module 4: Enumeration

1. Which of the following protocols is commonly used for enumerating Windows user accounts?

- A. SMTP
- B. SNMP
- C. NetBIOS
- D. FTP

Answer: C

2. What is the default port number for SMB enumeration?

- A. 137
- B. 443
- C. 139
- D. 21

Answer: C

3. Which tool is commonly used on Linux systems to enumerate Windows shares and users?

- A. Wireshark
- B. enum4linux
- C. Nikto
- D. Netcat

Answer: B

4. Which command is used to list user accounts on a Windows machine?

- A. whoami
- B. net user
- C. hostname
- D. ipconfig

Answer: B

5. Which SNMP community string is often used for enumeration by default?

- A. admin
- B. manager
- C. root
- D. public

Answer: D

6. Which Windows port is used by the NetBIOS session service?

- A. 137
- B. 138
- C. 139
- D. 445

Answer: C

7. What kind of information can be collected during SNMP enumeration?

- A. SSL certificates
- B. User browsing history
- C. System uptime and routing tables
- D. TCP banner messages

Answer: C

8. Which tool is used to interact with RPC services for enumeration?

- A. rpcinfo
- B. Netcat
- C. hping3
- D. Whois

Answer: A

9. Which port is primarily used for LDAP enumeration?

- A. 389
- B. 636
- C. 21
- D. 110

Answer: A

10. What is the result of a successful SMTP VRFY command?

- A. Password hash retrieval
- B. IP address of user
- C. Confirmation that a username exists
- D. Server crash

Answer: C

11. Which technique uses TCP or UDP to extract data from services like SMB and SNMP?

- A. Footprinting
- B. Enumeration
- C. Reconnaissance
- D. Phishing

Answer: B

12. Which enumeration method uses Windows RPC and null sessions to collect information?

- A. ARP cache poisoning
- B. NFS probing
- C. NetBIOS NULL session
- D. Passive scanning

Answer: C

13. Which command can be used to enumerate shared folders in Windows?

- A. ipconfig /all
- B. net view \\hostname
- C. tasklist /SVC
- D. ping \\hostname

Answer: B

14. Which tool provides SNMP enumeration functionality on Linux?

- A. snmpenum
- B. netdiscover

- C. dnsenum
- D. netcat

Answer: A

15. Which port is commonly used by Active Directory for enumeration?

- A. 21
- B. 389
- C. 1433
- D. 23

Answer: B

16. Which of the following is most useful in enumerating domain controllers?

- A. LDAP queries
- B. Ping sweep
- C. Port scanning
- D. MAC address spoofing

Answer: A

17. What is the role of a NULL session in Windows enumeration?

- A. Gathers encrypted credentials
- B. Executes scripts remotely
- C. Connects to IPC\$ share anonymously to enumerate info
- D. Exploits SQL databases

Answer: C

18. Which command is used to enumerate RPC services on Unix-based systems?

- A. rstatd
- B. showmount
- C. rpcinfo
- D. snmpwalk

Answer: C

19. Which of the following is a risk of enumeration activities?

- A. Revealing encryption algorithms
- B. Triggering IDS alerts
- C. Discovering SSL certificates
- D. Changing DNS records

Answer: B

20. Which command-line tool can be used to enumerate users via SMB?

- A. traceroute
- B. enum4linux
- C. tcpdump
- D. sqlmap

Answer: B

21. What data might be collected via NTP enumeration?

- A. Open web ports
- B. Time synchronization stats and version info
- C. Email addresses
- D. DNS zone transfers

Answer: B

22. Which Metasploit module can be used for SNMP enumeration?

- A. auxiliary/scanner/snmp/snmp_enum
- B. auxiliary/admin/smb/smb_enum
- C. exploit/windows/smb/ms17_010_eternalblue
- D. auxiliary/scanner/http/http_login

Answer: A

23. What is one purpose of enumeration in the ethical hacking lifecycle?

- A. Exploit vulnerabilities directly
- B. Identify valid usernames, groups, and shares
- C. Perform phishing attacks
- D. Obfuscate attacker identity

Answer: B

24. What is the default SNMP port?

- A. 161
- B. 80
- C. 110
- D. 443

Answer: A

25. Which of the following enumeration tools focuses on NFS shares?

- A. enum4linux
- B. nfsenum
- C. showmount
- D. smbclient

Answer: C
