Education

Vellore Institute of Technology

Sep 2022 – May 2026

Bachelor of Technology in Computer Science and Engineering

CGPA: 8

Certifications

EC-Council : CEH (Certified Ethical Hacker) v13 theory + practical, CHFI (Computer Hacking Forensic Investigator)

CompTIA : Security+ , Network+

AWS : Solutions Architect (Associate) , Cloud Practitioner (Foundational)

Cisco : CCNA (Cisco Certified Network Associate)

Microsoft : SC-900 (Security, Compliance, and Identity Fundamentals), AI-900 (Azure AI Fundamentals)

Experience

CloudSEK

Feb 2026 – May 2026

Cyber Security Analyst Intern

Bengaluru

- Performed security assessments across web, network, API, cloud, and supply-chain surfaces; analyzed 2,000+ GitHub repositories to detect exposed secrets, insecure configurations, vulnerable dependencies, and data leakage risks.
- Investigated security risks across 10+ enterprise environments using XVigil, BeVigil, and SVigil, identifying phishing infrastructure, credential leaks, malicious domains/apps, exposed assets, and third-party attack surface risks.
- Built Python automation for threat investigations and signal enrichment; correlated telemetry, threat intelligence, and vulnerability data to improve detection, reduce triage time, and support remediation with engineering teams.

Craw Security

Sep 2024 – Jan 2025

Pentesting & Network Security Intern

Saket, Delhi

- Performed vulnerability assessments and security testing of enterprise networks using Nmap, Metasploit, OpenVAS, and Wireshark to identify exploitable services, misconfigurations, and network weaknesses.
- Conducted digital forensics and incident response investigations, including forensic imaging, artifact recovery, and endpoint analysis across compromised Windows systems.
- Implemented SIEM monitoring using Splunk and Wazuh for log analysis and threat detection, while assessing wireless security (WPA2/WPA3) and researching FASTag RF vulnerabilities with HackRF.

Projects

AI-Assisted Security Automation Framework | ShellGPT, OpenAI API, Nmap, Hydra

[GitHub](#)

- Built an AI-assisted security automation framework integrating ShellGPT and OpenAI APIs to dynamically generate and execute reconnaissance and vulnerability scanning workflows.
- Enhanced reconnaissance and vulnerability assessment by automating Nmap, Sublist3r, Nikto, and Gobuster.
- Developed AI-assisted attack simulations for privilege escalation, brute-force attacks, and network enumeration.

Incident Handling & Threat Investigation | Splunk, Suricata, Sysmon, MITRE ATT&CK

[GitHub](#)

- Investigated simulated cyber attacks by analyzing network and endpoint telemetry from Suricata, Sysmon, and Apache logs within Splunk.
- Mapped adversary behavior to MITRE ATT&CK techniques and enriched IOCs with VirusTotal & AbuseIPDB.
- Built custom SPL detections and dashboards to accelerate triage and improve incident response workflows.

Wireless Network & RF Security Assessment | Flipper Zero (Marauder/HID), Hashcat, Wireshark

[GitHub](#)

- Performed Wi-Fi penetration tests including PMKID sniffing, handshake capture, and WPA2 password recovery with Hashcat.
- Simulated rogue AP credential harvesting using Marauder's Evil Portal to demonstrate phishing attacks against insecure SSIDs.
- Executed wireless HID keystroke injection attacks via Bluetooth HID mode, bypassing MFA/2FA in controlled tests.

Achievements

- Selected through a national-level technical evaluation to work with the Indian Army IAIP 2025 (STEAG) team on SDR programming and RF security research.
- TryHackMe: Ranked Top 2% Globally | Diamond League | 365-Day Streak | 200+ Rooms Solved
- Invited twice as a Guest Speaker at Jaipur National University to deliver cybersecurity career guidance sessions to 40+ BTech, MTech, BCA, and MCA students.
- Invited as a cybersecurity speaker for the Amroha Cyber Cell Internship Program , delivering sessions to 400+ attendees including Cyber Cell police officials, students, and working professionals.

Technical Skills

Security & Monitoring : Splunk, Suricata, OSSEC, Wazuh, Burp Suite

Security Testing & Analysis : Nmap, Metasploit, Wireshark, Hashcat, Hydra

Programming & Automation : Python, Shell scripting, Bash , Powershell , OpenAI API, ShellGPT

Systems & Platforms :Linux (Kali, Ubuntu, Debian), Windows, macOS, Raspberry Pi OS, DragonOS, SigintOS

Security Frameworks : MITRE ATT&CK, OWASP Top 10, NIST, CIS Controls
